

Iridium 9505a Vehicle Docking Unit allows using Iridium 9505a satellite phones in all types of vehicles, such as cars, trucks, boats and ships. Due to the nature of the satellite signal, requiring direct view of the satellite, **Iridium VDU** significantly increases reliability of the Iridium satellite service on the go.

Hands-free capabilities of **Iridium VDU** let you drive in comfort and safety while using your Iridium phone. With the Digital Signal Processing technology, the voice quality and comfort of use have never been greater.

Iridium VDU has built-in capabilities to use all features of your Iridium phone and service such as voice communications, text messaging, data transfer, voicemail and call holding/forwarding.

FEATURES:

- Full duplex hands-free operation of Iridium phones
- Perfect voice reproduction and echo cancellation
- Mutes car stereo when calling
- Two-mode operation: loud speaker or private talk (via optional handset)
